Providence, RI 02906

The behavior engaged in by Comcast in its blocking of peer-to-peer communications may only be the tip of the iceberg that is to come, should large corporations be allowed to act as gatekeepers of the Internet. This is precisely what millions of Americans have warned would occur without the protections offered by Net Neutrality. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Emlyn Addison
186 8th Street
Providence, RI 02906

If Comcast's blocking of peer-to-peer communications isn't construed here and now as evidence of a corporation run amok, then nothing ever will. In the interests of the public good, the FCC must take steps to prevent this and other Internet service providers from discriminating against the free flow of online information. Enough is enough.

Janice Antone

Comcast is fairly incompetent at the best of times. If they start deciding which subscribers get to do what with the bandwidth they've paid for, their customers will be faced with both a practical and an ethical disaster--Comcast will be doing something that shouldn't be done at all by anyone, and (being Comcast) they'd be doing it badly. The FCC must take serious and immediate action to preserve net neutrality. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I am also horrified that Comcast would hire "seat holders" to keep the public from attending the Boston hearing. That is dispicable, and just goes to show the corporate mindset in this country of late. If you can't win by legitimate means, then cheat! We need to show them that cheaters don't win. They should not be allowed to get away with this behavior.

First, I'd like to note that Comcast's packing of the hearing in Boston with paid seat-fillers with no interest on providing the Commission with information regarding the rule-making under consideration makes a mockery of the Commission's notice and comment procedures. To allow an interested party to block potentially adverse comments simply through the flexing of its financial muscle would be both arbitrary and contrary to law. The Commission should hold further hearing

in Boston to allow all interested parties to be heard on this issue. The reason for Comcast's interest in blocking citizen comment on the proposed rule is apparent. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The internet has become the absolutely most vital link that I have for access to news and information which I can trust to be reasonably unbiased and complete. I use the internet daily to share and exchange this information. I urge the FCC to take whatever measures are necessary to prevent internet service providers from interfering with this use of the internet. This would be a real disaster. I understand that this is exactly what COMCAST is doing and thus it should be stopped now before the practice spreads further. Robert Sumner-Mack

Warren, RI 02885

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I have also learned that the company paid individuals to simply take up seats at the FCC's recent hearing on Net Neutrality in Boston. While I am not surprised that a company so interested in influencing communications policy would do such a thing, I think it is a sad commentary on the state of our republic, and such underhanded tactics should not be tolerated by the FCC. The FCC should take serious and immediate action to put an end to the harmful practice of blocking peer-to-peer networks and prevent other Internet service providers from following Comcast's example of impeding the free flow of online information. The Internet is a vital tool for economic growth, civic participation and free speech. We simply cannot allow corporate gatekeepers to smother the communications of ordinary citizens by secretly interfering with Internet traffic and stifling innovation.

Cranston, RI 02920

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

So Comcast PAID people to go to the 'open' meeting. Do you see anything WRONG WITH THAT??? Does that tell you what COMCAST would like to see happen??? KEEP THE INTERNET FREE AND NEUTRAL. Big business knows it's days of influence are numbered. Have the GUTS to stand up for what is right for the American PEOPLE, NOT BIG BUSINESS. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans

have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I have personally had experience where Cox Communications in Rhode Island was blocking VOIP traffic from Packet8 (8x8, Inc.) this is unfair competition, as Cox Communications offers a competing VOIP product, so their ability to block their competitor's VOIP product gives them an unfair advantage, as most consumers aren't going to seek a way to resolve the problem, they'll simply falsely assume Packet8's service is somehow inferior, and switch to the Cox Communication product, which because its not being blocked, appears to work better. As a consumer of broadband internet services, I pay for a certain tier of service, my provider charges more for a 6 Mbps connection than they do for a 2Mbps connection. If I want increased bandwidth, I pay more for that higher tier of service already, at that point, what I do with the bandwidth I've paid for should be entirely up to me, as I have paid for it, and I should not be subjected to blocking, or "bandwidth shaping" which will effectively reduce or completely deny the level of service below the bandwidth tier I have paid for. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Allowing corporations to control the internet will only hurt the FCC. With public awareness growing in the US, citizens are becoming more and more fed up with censorship, invasion of privacy, and limitation of our constitutional rights (namely, freedom expression). As concern and awareness rises, so does the need for action. Controlling the internet, one of our few sources of information outside of the mainstream media, is sure to backfire, ruining public support for the FCC. This is still the United States of America, the people will always have power, and many of us will not stand to the side and allow these companies to take priority over us. Please work to allow each concerned, deserving citizen to have his or her voice heard. Thank you, Joseph V. Vaccaro III ----- Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information.
